

KIRAMEKISUI

You can drink mineral water in large quantities at a house.

Safe and delicious water with abundant minerals

The prejudice to better water changes you.

The prejudice to water can be called man's instinct. That is because the fact that about 60% of people's body is also made of water shows that water is very important. Therefore, I should think that everyone wants to choose better water. KIRAMEKISUI minimizes the burden of visitors, such as an order, a set, etc. of a troublesome heavy bottle. Moreover, it is possible to supply a mineral with difficult ingestion from present-day food with various minerals. Practical use for various scenes and the purposes is expectable.

Relief and safety

Since KIRAMEKISUI is a water server of safe and safety which cleared all of much special examinations, it can use in comfort.

- Accumulation toxicity test
- Chromosome aberration
- Ames test
- Fishes toxicity test
- Componential analysis

We analyze and improve thoroughly the place which the conventional water server cannot use easily, and make an easy-to-use water server.

For various uses

- Face toilet
- Care of hair
- Vegetable washing, rice grinding,
- Preparations of meat or a fish
- A cutting board, wiping
- A dog, a cat, a pet
- Disaster prevention, preservation in an emergency

22 or more kinds of minerals

A mineral carries out an action important for the physiology function of a living thing by a halfpennyworth, and has helped metabolism, such as enzyme. ex)The digestion of food, excretion of wastes, energy production

In many products of the other company, only four kinds, "calcium", "sodium", "magnesium", and "potassium", are contained.

Supply of a mineral can seldom expect. 22 kinds of minerals and 70 or more sorts of trace elements are contained in KIRAMEKISUI, and it is possible to take in a mineral with with high quality and sufficient balance.

Moreover, in order to use water with safe and abundant minerals by filtering the organic matter which carried out chelate by the mineral with 0.5 microfilters, it becomes water which is very easy to drink.

ろ過流量	約1.2L/時(平均)
ろ材交換時期	約5~8ヶ月(使用状況により異なります)

Idea

We understand a visitor's sense of values and view, and always continue aiming at the company which continues giving a visitor a dream and hope.

Our company makes an effort to consider a thing required in order that people may make a living, and create it.

President greeting

In Japan, I think that change came out also in national consciousness at the time of the nuclear power plant disaster of Fukushima to the water problem although the interest level was low since water was abundant.

If it is said from abundant Japan to the country and the area about which he feels easy and which water cannot drink whether water can export water, it will not become a price which people who need can purchase by problems, such as physical distribution cost.

With “the fresh water generation technology” which adds the mineral of our company, it is made even to water for agricultural use and waste industrial waters in offer from life water in budget prices, and I think that the portion about the water of the environmental pollution that becomes an issue with development is clearable.

It becomes the same meaning as exporting water to develop the present technology and to carry out a technological tie-up to the world.

I am sure of the water situation in the world changing a lot by it.
